6 JUN 1984

MEMORANDUM FOR: Executive Director

VIA: Deputy Director for Administration

FROM: [REDACTED] 25X1  
Acting Director of Security

SUBJECT: Industrial Security Seminar  
25-27 June 1984

1. The Office of Security is hosting an Industrial Security Seminar at Headquarters on 25, 26 and 27 June 1984. This is the sixth such conference the Office of Security has sponsored, and, as before, the attendees will be corporate security officers [REDACTED]

25X1  
25X1

[REDACTED] The agenda includes both general sessions and workshops which will be held in Room 1A-07, Headquarters, on all three days. Others in attendance will include our industrial security auditors and security officers assigned to the Office of Logistics Security Staff.

25X1

2. You are invited to speak to the group at the opening session on Monday, 25 June 1984 from 0915 to 0945 hours. We believe that it is very important to the success of this program to have the appearance of a senior Agency official as an expression of the interest and concern that we have for our industrial relationships. This has been a highlight of past seminars and we assure you that an appearance on your part will be well received. Critiques from previous attendees have been quite positive in this respect. Please be in touch with the undersigned on any aspect of this you would like to discuss.

## INDUSTRIAL SECURITY SEMINAR

25-27 June 1984

### AUDIENCE

\* Industrial Security Representatives representing 27 Office of Logistics contractors from 10 states. (See attached.)

### TOPICS OR THEMES

*Welcome*  
\* Considerable progress has been made in the 6 years since attention was focused on industrial security as a consequence of the Boyce/Lee espionage case.

\* Progress from the Agency standpoint: Establishment of the Industrial Polygraph Program and the Industrial Security Branch. Industrial Security Branch has conducted over  security audits of contractor facilities and Industrial Polygraph Program has been a significant enhancement of the overall security effort. The number of industrial security officers assigned to contracting elements of the Agency has almost doubled.

25X1

\* Computer security has developed into a major concern by both the Agency and in the industrial setting. The Information Systems Security Group has been tasked with meeting the challenge and is currently assisting contractors in dealing with this security concern.

\* The threat remains. Classic espionage efforts have increased at an alarming rate and with known success. The Bell case at Hughes Aircraft Company and the Harper case in Silicon Valley are prime examples. Technology transfer continues to be of serious concern. (Hughes reps will be in attendance at the seminar).

\* Problems remain. The difficulties and especially the costs associated with any security program are fully recognized. Requirements frequently outpace formal guidelines and new guidelines invariably need to be modified or interpreted. You will be dealing with several of these problems during this conference.

*Leads* → *Cooperation*  
\* To meet the current threat and deal with current and future problems requires a close working relationship between the Agency and industry. The Agency is fully cognizant that many contractors handle some of the most sensitive information dealing with our National Security. We are encouraged by the cooperation and support received from industry and will make every effort on our end to ensure this continues.
